Patient: Lyndsey Lowe**Age:** Young Adult**Home:** Southern Utah**Treatment:** Seven front
veneers

Before

After

Real Stories about Real Smiles.

Q: Why did you have the cosmetic dental work done?

"I had an OK smile, but some of my teeth were chipping and quite thin. After talking about it for about two months with my parents we decided to make it happen. My brother had his smile makeover six months before me so I couldn't let him have the best smile."

"I had the advantage of having my brother get his smile done first by Dr. Utley. In one way it made me more sensitive to my smile, but in another it was great to know the latest ways to make my smile a little better than I was born with."

"A great smile is such a reflection of how you feel and how others perceive you that I wanted to do something about it early in my life rather than wait until later on."

Q: What was the cosmetic dental process like?

"The first step was having Dr. Utley go over the scope of work that was being done. We discussed color, size, shape, The second step was to prep my teeth, take impressions and make molds."

"Temporary wax veneers were the thing. This part was important because you got to 'test-drive' the look before deciding. We needed to

do some re-sizing to make sure the veneers matched my mouth and face."

"The whole process took about six visits, including the special adjustments for size and fit."

Q: How did you feel about your new smile?

"I feel glamorous. I was really happy with the way my smile turned out. It's interesting how your smile affects how you feel about yourself and how others look at you."

Q: Why did you choose Dr. Utley?

"I like Dr. Utley best. He's been our family dentist for years so he's the one we trust for all of our dental work. He never rushes you and always makes sure you're happy with the results."

"I feel glamorous. I was really happy with the way my smile turned out,"

Dan Utley, DDS

"Come and see what a beautiful smile we can create for you!"
